

Why ARE WE the Leader of the Outdoor Movie Industry?

Because we invented it. More than 15 years ago, the first inflatable movie screen was created. Since then we have been providing inflatable outdoor movie screen systems and complete outdoor movie packages to film festivals, filmmakers, movie premieres, sporting events, Fortune 500 companies, universities, entrepreneurs, parks and recreational departments and other governmental agencies. We have sold hundreds of screens in 50 countries to customers from Arizona to Uruguay. You can count on us for quality, attention to detail and service after the sale.

Sales & Service

We will work with you to determine the best screen system and movie package to fit your needs and your budget. But we never compromise. Outdoor Movies uses only the highest quality and most technically superior equipment. And we will be there after the sale to walk you through setup and operation.

Innovative Design

Outdoor Movies and AIRSCREEN have spent years refining our screens and audio equipment. We take customer feedback seriously and combine it with our own extensive use. It is our goal to give your audience the best outdoor movie experience on the planet.

5 Reasons Why AIRSCREEN is the Best on the Market

1. Innovative Technology

Outdoor Movies' innovative welding process fuses the frame material together creating an airtight seal. Other companies sew their frames, leaving tens of thousands of small holes that allow air to escape and moisture to get in. Those holes grow larger every time the screen is inflated. Our high-tech sealing process creates a higher internal pressure, resulting in a frame that stands up far better to windy conditions—and prevents internal mold and mildew. AIRSCREEN frames have extraordinary durability, lighter weights and a longer life.

2. Quality Screen Surface

Our screen surfaces are up to five times stronger. So they maintain a smooth, flat surface for superb image quality even in normal wind conditions. Many inflatable screen surfaces are made from thin materials that allow ripples or pillowing. This causes distortion and ruins the movie image. We use thicker screen surfaces so your audience sees a perfect picture every time

3. Easy and Safe Operation

Our screens set up fast, feature hands-free inflation, and are easy to deflate, pack and store, all in a more compact size than other screens. All of our AIRSCREEN AEROPRO™ screens inflate in less than five minutes, and deflate in less than four.

4. Front or Rear Projection

All of our outdoor movie screens come with either a front- or rear-projection screen surface. They're interchangeable. Buy both to accommodate any venue. Front projection—used in movie theaters—gives the most cinematic experience and highest quality image. Rear projection allows you to store all of the equipment behind the screen and away from the audience.

5. Support & Training

Every Outdoor Movies screen and system comes with a clear step-by-step manual, and if you need help we're only a phone call or e-mail away. We have always offered great service before and after the sale. Our customer service team is happy to answer all your questions and can walk you through the process. Or for a more hands-on customized approach, ask about our on-site training.

We are the exclusive distributor for AIRSCREEN inflatable outdoor movie screens in North America. With welded frames, thicker screen surfaces and a wind rating of 26 mph, why would you choose anyone else?

AIRSCREEN AEROPRO™

Inflatable Outdoor Movie Screen Systems

The AIRSCREEN AEROPRO™ is our most popular outdoor movie screen. It offers both elegance and ease of use at an intelligent price. It comes in both standard and wide screen formats—up to 40 feet wide—and can accommodate audiences of up to 1,500 people (see screen-sizing chart). AIRSCREEN AEROPRO™ outdoor movie screens are manufactured with thicker screen surfaces and an innovative welding process that fuses the frame material together creating an airtight seal.

As the world's leading supplier of inflatable outdoor movie screens with 15 years of experience and hundreds of screens sold in over 40 countries, our reputation for quality, innovation and service is well known. The minute your AIRSCREEN AEROPRO™ arrives, you'll know you've purchased a superior product that will perform flawlessly for years to come..

Here are just a few of the unique characteristics that make AIRSCREEN the industry leader:

- Rated for winds up to 26 mph
- Welded construction keep air in and moisture out
- Screen surfaces up to five times stronger
- Professional front or rear projection surfaces
- 30% lighter frame
- Easy and safe operation
- Available in widths from 16 to 40 feet
- One complete unit—no loose parts to misplace
- For indoor and outdoor use
- High pressure blower
- Black nylon high-tension tethers
- Specially-designed bungee ties
- Four double-headed 32" steel stakes
- Sledgehammer or mallet

Each AIRSCREEN AEROPRO™ system comes with the following accessories:

- Deluxe repair kit
- Step-by-step operation manual
- Heavy-duty carry bag with handles
- 3-year warranty

Complete Outdoor Movie Packages

AEROPRO™ Control Centers

We design our control centers for ease of use and fast setup, using professional high-quality, branded components. Both the PRO HD and the PLUS control centers provide outstanding audio and durable handling to satisfy discerning audio visual professionals.

AIRSCREEN AEROPRO™ Outdoor Movie Packages come complete with everything you need to create a stunning outdoor movie experience. Each package features an AIRSCREEN AEROPRO™ inflatable movie screen, and state of the art digital projection and sound using top-rated digital projectors and brand-name speakers.

We offer complete portable turnkey outdoor movie systems that will have your audience cheering for more. Why? Because of the crisp, clear sound and brilliant, beautiful colors that the AIRSCREEN AEROPRO™ outdoor movie package delivers every time. Choose from screens in popular sizes ranging from 16 to 40 feet wide. With every complete outdoor movie package you get your choice of packages; our Pro High-Definition Control Center, or our more affordable Plus Control Center.

PRO HD

For the frequent user who needs more features—and wants to be HD ready—we recommend our PRO HD system. With this system you'll have everything you need to...Show HD content with the BluRay player. Switch to additional content (like a sponsor's spot or a short cartoon) with the second progressive scan DVD player. Run a second copy of your movie simultaneously for a failsafe environment. Use the triple-screen monitor to preview your content. Play music through the JBL Sound System when you plug into the iPod dock or CD on the professional audio mixer. And attach a gaming device to project the action onto the big screen.

PLUS

For the less frequent user looking for a basic system we recommend our PLUS system. It comes with one DVD player and monitor, but still has many of the same great features of our PRO HD system. Our PLUS system is lighter, more compact and extremely easy to use.

Each AIRSCREEN AEROPRO™ Outdoor Movie Package Includes:

- AIRSCREEN AEROPRO™ Inflatable Outdoor Movie Screen System
- AEROPRO™ PRO HD Control Center & Sound System or PLUS Control Center & Sound System
- Digital Projector & Stand
- Storage cases and bags to protect all of your equipment

Each PRO or PLUS package you purchase comes with a Digital Projector & JBL sound system

Digital Projector Stand

We match each AIRSCREEN™ Outdoor Movie System with a digital projector based on the recommended brightness for the size of your screen. Other outdoor movie systems build the projector right into the audio equipment, which means your images are projected from just two to three feet off the ground. Not us! We provide a separate 58" tall projector stand, which elevates your projection to the proper height. Which means you won't have to worry about audience members walking around and disrupting the image

Each digital projector comes with the following accessories:

- Standard lens
- Projector case
- 58" projector stand with handle and telescopic legs

JBL Sound System

Each Outdoor Movies package comes with the ultimate in audio performance, including the groundbreaking and industry-standard EON® series portable loudspeakers. The EON® series raises the bar in the category of molded powered loudspeakers in all aspects, from industrial design to sonic performance, integrated utility and portability

Each JBL sound system comes with the following accessories:

- Protective Carry bags
- Telescoping tripod speaker stands with carry bags
